

AllpakTrojan has reached new heights yet again; this time of the Guinness World Record variety. On August 18, 2007, city volunteers from Cheney and surrounding areas, and AllpakTrojan built the largest corrugated box sculpture utilizing a whopping 8,083.25 square feet of material! The replica of a medieval castle stood 6 ft 8 inches high, 111 feet 9 inches long by 72 ft 4 inches wide. AllpakTrojan was recently informed that their achievement set a record, and received a special certificate from Guinness World Records.

As a manufacturing and printing company, AllpakTrojan is poised to make a positive impact in protecting the environment. Therefore, we incorporate and promote healthy, ecologically sustainable business practices in the workplace. As such, AllpakTrojan ensured that all the material used for the sculpture was recycled appropriately after the event.

It takes a unique group of people working together to complete such a feat, and this is the kind of team work, imagination, and results you can come to expect from AllpakTrojan. We're now part of the very select club of Guinness World Records holders. Let us help you set a record with your printing, packaging, and display needs. www.allpaktrojan.com
